Why Invest in Small and Mid Caps ?

Small and Mid caps have the potential to outperform Large caps

Small and Mid caps outperformed large caps 52% and 92% of the times, respectively, on a 5-year rolling basis

5 Years Rolling Returns Analysis		Midcap	Smallcap
Number of Observations		2250	2250
% of Observations beating Large Cap returns		92.1%	52.5%
Maximum outperformance		12.1%	12.4%
Maximum underperformance		-2.0%	-7.4%

Data representation is for June 2015 to June 2024 period
Source: MFIE

The above chart is for understanding purpose only. Past performance may or may not sustain in the future. Mid caps are represented by Nifty Midcap 150 TRI, Small caps by Nifty Smallcap 250 TRI and Large caps by Nifty 50 TRI.

Some themes have better representation in Small/Mid Cap space

- **Software Product Development Companies**

India is seeing emergence of some interesting IT product companies that are different from the normal IT Services companies

- **Discretionary Retail**

This segment is a beneficiary of rising per capita GDP and higher discretionary spends. Many sub segments find no representation in large caps like footwear, clothing brands, food and retail chain, etc.

- **Hospitality**

Increasing incomes will lead to people travelling more and holidaying. The need for hotel rooms & airlines will grow manifold

- **Real Estate**

Housing will be a long-term story in India. Post RERA, the transparency has gone up and overtime the competition will come down.

- **Home Building**

As a corollary to the real estate sector, as the sector takes off, there will be a good demand of tiles, sanitary ware, plywood etc. There is very little representation of large caps in the segment.

- **Chemicals**

The sector is seeing a lot of vibrancy in terms of growth and profitability as China clamps down on pollution. Lots of business is flowing to India

Why Invest In A Small And Mid Cap Oriented PMS?

- **Unconstrained**

A Midcap Mutual Fund has to mandatorily invest 65% in stocks of mid-sized companies i.e. 101st to 250th companies based on market capitalization. Similar restrictions exist for Small Cap whereas, a Portfolio Management Service (“PMS”) does not have any such restrictions, allowing for flexibility with respect to investments

- **Customization**

PMS, unlike MFs, can be customized to fit an investor’s preferences (including but not limited to one’s religious beliefs with respect to certain sectors)

- **Concentrated portfolios**

PMS can hold concentrated positions as it is not constrained by regulatory limits on sectoral or company-specific exposure

PGIM

India Portfolio
Management Services

**Is it a good time to consider
allocations to Small and Mid Cap
segment?**

Small and Mid Caps post a sharp recovery post drawdown

Past small cap corrections

Bearish Events	Period	Drawdown	1 Year Return	2 Years Return	3 Years Return
Sub-prime Crisis	Jan 2008 - March 2009	-75.98%	171.20%	163.80%	146.50%
China stock market crisis, Greece debt default	Aug 2015 - Feb 2016	-23.70%	47.90%	89.20%	37.10%
SEBI reclassification, Credit Crisis, Covid	Jan 2018 - Mar 2020	-60.79%	131.90%	215.00%	193.40%
Russia-Ukraine conflict, inflation concerns	Oct 2021 - Jun 2022	-26.88%	37.45%	122.7%	???

Past mid cap corrections

Bearish Events	Period	Drawdown	1 Year Return	2 Years Return	3 Years Return
Sub-prime Crisis	Jan 2008 to Mar 2009	-69.58%	157.50%	161.30%	161.80%
European Crisis	Nov 2010 to Dec 2011	-38.29%	40.30%	29.80%	103.80%
SEBI reclassification, Credit Crisis, Covid	Jan 2018 to Mar 2020	-49.43%	116.60%	165.10%	172.20%
Russia-Ukraine conflict, inflation concerns	Oct 2021 to Jun 2022	-23.09%	39.68%	119.3%	???

Small caps represented by Nifty Smallcap 250 and Mid caps represented by Nifty Midcap 100

The extent of drawdowns is a factor in determining risk but the time taken to recover a drawdown is an equally important factor. Historically, small and mid caps have demonstrated a decent drawdown recovery.

Data as on June 30, 2024. The Returns of 1 year, 2 years and 3 years are absolute returns and are calculated from the end of the correction for the mentioned events. Source: MFIE, Internal Analysis. The above table is only for illustration purpose and should not be construed or related to the performance of the strategy.

Phoenix Portfolio

**Structural Growth and Cyclical
Opportunities**

Phoenix Portfolio - Proposition

- Focus on buying businesses that are close to the inflection in their lifecycle either due to cyclical or structural reasons.
- Concentrated portfolio of Small and Mid Cap companies.
- Low overlap with the mainstream products.
- Long term holdings with low churn.

PGIM

India Portfolio

Phoenix Portfolio Construct

Investment Process

The investment process consists of

- (a) Screening all possible choices to create an investment universe of acceptable quality
- (b) Further filter the Universe on the basis of growth prospects and management quality
- (c) Construct the portfolio using filters of valuation levels, and sector exposure limits.

Note: Minimum 75% of the portfolio at all times follows the above-mentioned process. The fund manager may exercise discretion up to 25% of the portfolio for including financial companies, high conviction ideas or companies which meet most of the above criteria but fail on a single parameter.

Investment Process : Multi-Stage Filters

- The portfolio manager looks for:
 - The ability of the company to grow its sales and profits greater than industry average, over the next 3-5 years
 - The ability of the company to do this without consistently resorting to additional external funding
 - The track record of the management in capital allocation, and in treating minority shareholders fairly
- Portfolio manager is conscious of prevailing valuations at all times, which should be reasonable considering future growth prospects
- Sell Discipline – when the investment thesis changes fundamentally, we look to exit from the stock

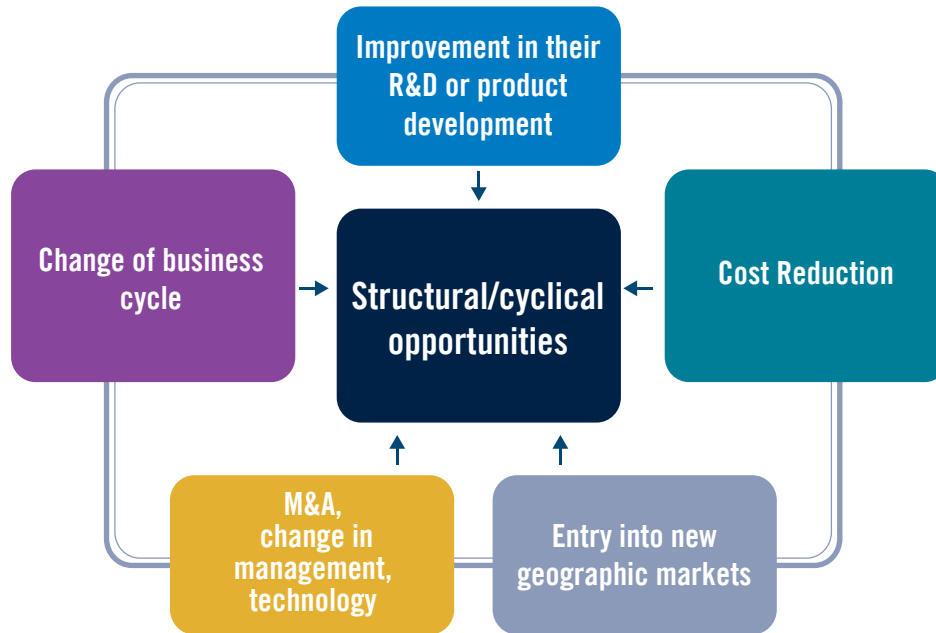

Portfolio Sell Discipline

- When the fundamental thesis for buying a stock changes
- When the valuation is unable to explain the stock's price
- When for the same perceived level of risk, we spot a superior opportunity
- When there is a redemption request

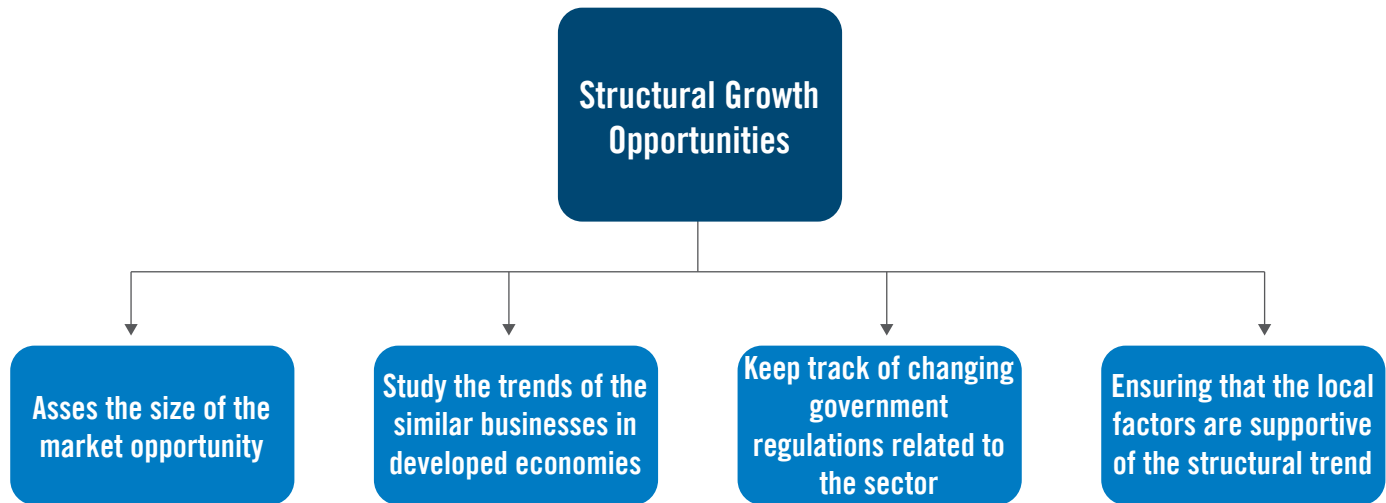

Not all Small and Mid Caps are new businesses

Approach to identifying opportunities in mature businesses

Approach to identifying opportunities in structural growth areas

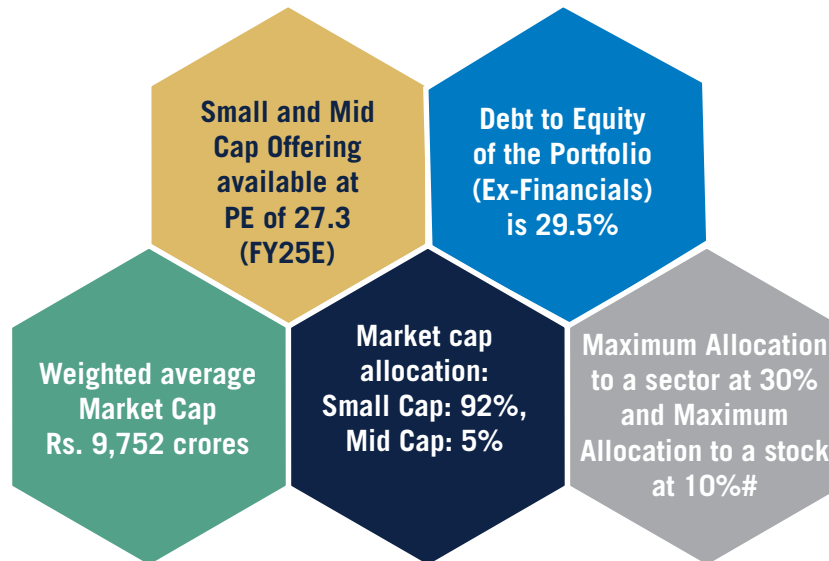

Past examples of quality businesses that have grown sales and profitability

PGIM India PMS Team

Investment Approach

Portfolio Name	PGIM India Phoenix
Investment objective	The objective of the portfolio is to generate capital appreciation over the long term by investing in quality Small and Mid Cap Indian companies.
Types of Securities	All funds would be predominantly invested in listed equity and equity related securities.
Basis of Selection	The central theme of the product is that the Portfolio Manager would choose stocks of companies that, in his assessment, are close to an inflection point in their lifecycle either due to a cyclical or structural changes. The Phoenix Portfolio, as the name suggests, would concentrate on companies whose financial and operational performance (profit margins, market share etc.) at the time of investment would be below the long-term average performance displayed by the company.
Asset Allocation	At least 75% of the portfolio would be invested in the shares of Small and Mid Cap companies.. Pending deployment of funds of the Portfolio in securities in terms of the investment objective, the funds of the Portfolio may be parked in short term deposits of scheduled commercial banks or in the liquid and debt schemes of PGIM India Mutual Fund.
Investment Horizon	Markets usually take time to spot value, hence it is advisable for investors to be invested for at least 3 years.
Risk associated	Please refer to Disclosure document at www.pgimindiapms.com
Benchmark Index	Nifty 50 TRI
Principal Officer	Surjitt Singh Arora

Important Disclosures regarding the consolidated portfolio performance:

The holding represents top 10 holdings and the top 6 GICS sector allocations of PGIM India Phoenix Portfolio - Regular Portfolio based on all client portfolios existing as on June 30, 2024, excluding any temporary cash investments. The performance related information provided herein is not verified by SEBI. Performance depicted as at the above stated date is based on all the client portfolios under the Regular Portfolio of existing as on such date, using Time Weighted Rate of Return (TWRR) of each client. Past performance is no guarantee of future returns. The above portfolio performance is after charging of expenses (as depicted above). Return for period upto 1 year is absolute. Since inception date stated is considered to be the date on which the first live client investment was made under the strategy. Please note that the actual performance for a client portfolio may vary due to factors such as expenses charged, timing of additional flows and redemption, individual client mandate, specific portfolio construction characteristics or other structural parameters. These factors may have impact on client portfolio performance and hence may vary significantly from the performance data depicted above. Neither the Portfolio Manager, nor its directors or employees shall in any way be liable for any variation noticed in the returns of individual client portfolios. The Portfolio Manager does not make any representation that any investor will or is likely to achieve profits or losses similar to those depicted above.

Please note that performance of your portfolio may vary from that of other investors and that generated by the Investment Approach across all investors because of

- 1) the timing of inflows and outflows of funds; and
- 2) differences in the portfolio composition because of restrictions and other constraints.
